AQUATIC BIOLOGY AND OCEANOGRAPHY

SELECTED LIST OF BOOKS

by Paul T. Macy and Ida K. Johnson

This publication has been prepared to furnish information sources to students and others who are interested in fishery science, aquatic biology, and oceanography. The references range from general works to books with which the reader may identify species of mollusks, fish, invertebrates, or aquatic plants. Those who wish to read further on special topics will find additional references included in many of the books on the list.

GENERAL

- BOULENGER, E. G.
1931. Fishes. Chapman & Hall Ltd., London, 174 p., illus.
- BROWN, MARGARET E(LIZABETH) (Editor).
1957. The physiology of fishes. 2 vols. Academic Press Inc., New York. (Vol. 1: Metabolism. 447 p., illus.; vol. 2: Behavior. 526 p., illus.)
- CHAPIN, HENRY, and F. G. WALTON SMITH.
1952. The ocean river. Charles Scribner's Sons, New York. 325 p., illus.
- CONSTANTIN-WEYER, MAURICE.
1956. The private life of fishes. Translated by Ray Turrell. Richard Bell, [London]; Putnam, New York. 150 p., illus.
- CURTIS, BRIAN.
1938. The life story of the fish. D. Appleton-Century Co., New York. 260 p., illus.
- DAVIS, CHARLES C(ARROLL).
1955. The marine and fresh-water plankton. Michigan State University Press, [East Lansing]. 562 p., illus.
- DEAN, BASHFORD.
1895. Fishes, living and fossil; an outline of their forms and probable relationships. Macmillan & Co., New York. 300 p., illus. (Columbia University Biological Series. III.)
- DUFRESNE, FRANK.
1946. Alaska's animals and fishes. Binfords and Mort, Portland, Oregon. 297 p., illus.
- DUGAN, JAMES.
1956. Man under the sea. Harper & Bros., New York. 332 p., illus.
- GREEN, JAMES.
1961. A biology of crustacea. Quadrangle Books, Inc., Chicago. 180 p., illus.
- HERALD, EARL S.
1961. Living fishes of the world. Doubleday & Co., Inc., Garden City, N. Y. 304 p., illus., color illus.
- JENKINS, J. T.
1921. A history of the whale fisheries; from the Basque fisheries of the tenth century to the hunting of the finner whale at the present date. H. F. & G. Witherby, London. 336 p., illus.
- JORDAN, DAVID STARR.
1905. A guide to the study of fishes. In 2 vols. Henry Holt & Co., New York. (Vol. 1: 599 p., illus.; vol. 2: 624 p., illus.)
1929. Manual of the vertebrate animals of the northeastern United States inclusive of marine species. 13th edition, completely revised and enlarged. World Book Co, Yonkers-on-Hudson. 446 p., illus.
- JORDAN, DAVID S(TARR), and BARTON W. EVERMANN.
1941. American food and game fishes; a popular account of all the species found in America north of the equator, with keys for ready identification, life histories and methods of capture. Doubleday, New York. 574 p., illus.

Note:--Paul T. Macy, Fishery Research Biologist, Bureau of Commercial Fisheries Biological Laboratory, U.S. Fish and Wildlife Service, Seattle, Washington; and Ida K. Johnson, Reference Librarian, U.S. Department of the Interior, Washington, D.C.
Revision of Fishery Leaflet 162.

General--Continued

KEEP, JOSIAH.

1935. West Coast shells; a description in familiar terms of the principal marine, fresh-water, and land mollusks of the United States, British Columbia, and Alaska, found west of the Sierra. Revised by Joshua L. Baily, Jr. Stanford University Press, Stanford University. 350 p., illus.

MS #1127

Created in 1849, the Department of the Interior—America's Department of Natural Resources—is concerned with the management, conservation, and development of the Nation's water, fish, wildlife, mineral, forest, and park and recreational resources. It also has major responsibilities for Indian and Territorial affairs.

As the Nation's principal conservation agency, the Department works to assure that nonrenewable resources are developed and used wisely, that park and recreational resources are conserved for the future, and that renewable resources make their full contribution to the progress, prosperity, and security of the United States—now and in the future.
